**SPONTANEOUS COMPULSION TO PROFILE HUMAN RELATIONSHIP**

It is a human tendency to look for pattern and meaning in the chaos that surrounds us. In a world that is often unpredictable and full of complexity, it is natural for us to seek out order. This can manifest in various ways, such as through our personal relationships, our work, or even our hobbies. The process of profiling involves taking something that is inherently erratic and trying to make it predictable. It is a common trait among many individuals, and it can be seen in the way that people attempt to make sense of their world through patterns and relationships.
